

STEEL_{FOR} PACKAGING

Reduced emissions

European steel industry is committed to continually reducing energy use and emissions.

- CO₂ emissions from steel production are today **50% lower** than 40 years ago
- CO₂ emissions from a standard steel can are today **30% lower** than 15 years ago
- Steel packaging recycling **saves 4 million tonnes of CO₂ each year**
- Each item of recycled steel packaging **saves over one and a half times its weight** in CO₂
