

STEEL_{FOR} PACKAGING

Recycled content

High recycling rates and 100% recyclability mean that steel is produced with an average of over 55% of recycled material.

- **Over 70%** of steel packaging in Europe is recycled each year
- **All steel**, including steel for packaging, is made using ferrous scrap
- Primary and secondary steel have **identical properties**
- **Using recycled material** saves raw materials, energy, water and lowers CO₂ emissions
